HAMMOCK

Lend and borrow onchain.
Keep your balance sheet private.

Encrypted Lending on Solana · Pre-seed

Existing lending protocols expose borrowers' positions.

Entity	Protocol	Collateral	Debt
Kyle Samani	Kamino Position 1 ↗ · Position 2 ↗	$133M	$47M
SOL Strategies	Kamino View position ↗	$26M	$10M
Abraxas Capital	Aave View position ↗	$33M	$4M

Institutions need privacy to move finance onchain.

"Confidential settlement infrastructure addresses one of the largest pain points for institutions trading digital assets"

GSR ↗

Leading market maker

"Privacy is a core functionality needed to bring global finance on-chain"

Sol Strategies ↗

Public Solana treasury

"Preserving strict confidentiality is a prerequisite if a unified ledger is to be a practical proposition."

BIS ↗

63 central banks · 95% of world GDP

The financing trilemma

FINANCING
Unlock capital efficiency

Banks · Canton · Zama

Aave · Morpho · Kamino

HAMMOCK
solves this

PRIVACY
Protect user sovereignty

Zcash · ZK proofs · Arcium

DECENTRALIZATION
Prevent intermediary control

Confidential positions. Transparent markets.

Read the research ↗

Our roadmap to scale encrypted lending.

	Alpha	Beta	Open
	Pre-seed	Seed	Series A
Growth	First mover	→ Onboard & retain	→ Expand & compound
Assets	Initial market, SOL/USDC	→ Major Solana assets	→ Native assets, any network
Access	Verified cohort	→ Permissionless deposits	→ Permissionless liquidation
Products	Variable-rate lending	→ Vaults & leverage	→ Fixed-term lending

Lending generates revenue.

Average loans outstanding	$100M	$1B	$10B
	↓	↓	↓
Annual revenue	$1M	$10M	$100M

Illustrative · 10% APR × 10% protocol share

Seasoned crypto builders

Experience in DeFi lending and encryption.
